

B-LITE® FACTS & FIGURES

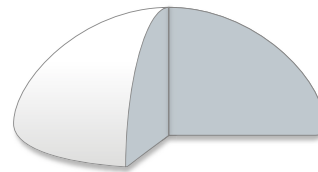

The world's first and only Lightweight Breast Implant

UP TO
3 LIGHTER %

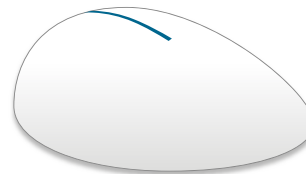

Up to 30% lighter than traditional silicone implants

The unique B-Lite® gel – a combination of the latest generation of cohesive silicone gel bonded with Lightweight microspheres

In 2013 B-Lite® implants gained CE approval, creating a new category of Lightweight Breast Implants

B-Lite® implants are available in over 200 variants of round and anatomical shapes, different projections and multiple surfaces, including MESMO® fine-microtextured and the unique shell cover Microthane®

Since its commercial introduction in 2013, thousands of women have chosen B-Lite® for both aesthetic and reconstructive breast surgery. B-Lite® studies show: The average age of women choosing B-Lite® is 33 years old

B-Lite® is currently available in over 40 countries worldwide

Hundreds of surgeons in all global regions* have chosen B-Lite® for their patients, in both breast aesthetic and reconstruction procedures

* not in the US and Canada

B-Lite® implants are produced in Germany by POLYTECH, one of the world's leading breast implants manufacturers
